EDUCATION

University of Arkansas

B.S. in Computer Science

- o **GPA:** 3.475
- o **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Object-Oriented Programming

Fayetteville, Arkansas

August 2022 - May 2025

EXPERIENCE

Accenture

Austin, Texas

Tech Architecture Analyst

September 2025 - Present

- Built a Node.js/MCP tool that queries live incident data via SQL, with configurable current and historical P1–P3 windows, and generates branded executive PDF reports with KPIs, severity breakdowns, and recurring trends.
- Deployed production SLOs and observability dashboards for 10+ enterprise apps using Dynatrace, dtctl, and GitHub-managed YAML, validating thresholds against 30/60/90-day production telemetry.
- Diagnosed latency SLO volatility in a flagged application, traced it to interval-average binarization with too little threshold margin, and delivered a clear remediation path.
- Developed 5 Excel VBA automations with Microsoft Copilot, saving 100+ hours of manual work.
- Contributed skill and context files to a shared GitHub Copilot knowledge base to standardize AI-assisted engineering, using branch and rebase workflows in a central repo.
- Coordinated delivery across 11 workstreams during a large-scale go-live, supporting cutover, hypercare, real-time issue triage, and action-item tracking.
- Onboarded and mentored new team members on environment setup, GitHub Enterprise access, and VS Code, and improved the onboarding documentation.

Accenture

Bentonville, Arkansas

Tech Architecture Summer Analyst (Software Engineering Intern)

June 2024 - August 2024

- Enhanced contact center AI capabilities for one of the world's leading retailers by integrating and utilizing their custom Natural Language Understanding (NLU) platform, while collaborating with cross-functional teams to design and deploy solutions.
- Developed, optimized, and tested backend systems in Java and frontend components for the NLU platform, ensuring scalability, efficiency, and a seamless user experience.
- Implemented thorough testing and debugging procedures for both backend and frontend systems, resolving issues and enhancing overall system performance and reliability.
- Helped to migrate the team's application from an obsolete to a more robust front-end platform to optimize costs and improve developer productivity.

DevelopIQ

Fayetteville, Arkansas

Lead Developer

January 2025 - June 2025

- Enhanced search functionality by implementing advanced filtering
- Optimized mobile compatibility to expand accessibility and reach a broader user base.

ACTIVITIES AND LEADERSHIP

Association for Computing Machinery

Fayetteville, Arkansas

Member

August 2022 – May 2025

SKILLS

Programming: Java, Python, JavaScript, TypeScript, HTML/CSS, C++, Node.js, SQL, JSON, Linux, F#, MIPS

Tools & Platforms: Dynatrace, dtctl CLI, DQL, GitHub Enterprise, GitHub Copilot, Microsoft Copilot, VS Code, WSL, Jira, Excel (VBA/Macros), Slack, Google Dialogflow, PyCharm, Eclipse, IntelliJ, Rider, Netbeans

SRE & DevOps: Service Level Objectives (SLOs), Incident Management, Production Telemetry Analysis, Git workflows, MCP integrations, PDF/HTML report generation, SharePoint, Microsoft Teams

AI & Automation: GitHub Copilot, Microsoft Copilot, AI-assisted VBA automation, Copilot-assisted engineering workflows, Google Dialogflow NLU
